Subject: [Non-DoD Source] EPA HQ Red Hill

Hi folks,

Please see below from Tom, not sure where EPA HQ got their information, but will work with our folks on clarification should any inquiries come in.

Thanks!

Dean Higuchi
Press Officer/Congressional Liaison/Public Affairs US EPA, Region 9, Hawaii Office
higuchi.dean@epa.gov

Dean,

Yes, this was put out by our HQ. I have alerted the head of our press office here. I agree we may have to clarify if inquiries come our way. I will keep you posted if that is the case.

Tom

Tom Huetteman, Assistant Director
Land Division, EPA Region 9

>> EPA Announces 2015 Annual Environmental Enforcement Results

>>

>> WASHINGTON - The U.S. Environmental Protection Agency (EPA) today released its annual
enforcement and compliance results highlighted by large cases that reduce pollution, level the playing
field for responsible companies, and protect public health in communities across the country. In fiscal year
2015, EPA secured record-setting hazardous waste, Clean Air Act, and Superfund settlements, and acted
swiftly to win a large criminal plea agreement following a major coal ash spill, among other
accomplishments. Additionally, EPA made significant progress on cases that will benefit communities well
into the future, by pursuing a final settlement that puts billions of dollars to work restoring the Gulf and
helping communities affected by the BP oil spill, and by launching an investigation against Volkswagen for
illegally emitting air pollution from diesel vehicles.

>>

>> "The large cases we tackled in 2015 will drive compliance across industries, and protect public health
in communities for years to come," said Cynthia Giles, Assistant Administrator for EPA's Office of
Enforcement and Compliance Assurance. "These cases are putting cutting edge tools to work, and using
innovative approaches to reduce pollution. Through another strong year in enforcement, we are
implementing America's environmental laws and delivering on EPA's mission."

>>

>> In fiscal year 2015, EPA enforcement actions required companies to invest more than \$7 billion in
actions and equipment to control pollution and clean up contaminated sites. EPA's cases resulted in \$404
million in combined federal administrative, civil judicial penalties, and criminal fines. Other results include:

>>

>> . Reductions of an estimated 430 million pounds of air pollutants.

>> . Almost \$2 billion in commitments from responsible parties to clean up Superfund sites.

>> . More than \$39 million invested in environmental projects that provide direct benefits to communities harmed by pollution.

>>

>> -----

>> EPA pursues high impact cases that drive compliance across industries:

>>

>> . Mosaic Fertilizer, LLC<<https://wcms.epa.gov/enforcement/mosaic-fertilizer-llc-settlement>>, one of the world's largest fertilizer manufacturers, committed to ensuring the proper treatment, storage, and disposal of an estimated 60 billion pounds of hazardous waste at eight facilities across Florida and Louisiana, the largest amount of hazardous waste ever covered by a federal or state Resource Conservation and Recovery Act settlement.

>>

>> . A Clean Air Act settlement with Hyundai-Kia<<http://www.epa.gov/enforcement/hyundai-and-kia-clean-air-act-settlement>> netted a record \$100 million penalty, forfeiture of emissions credits, and more than \$50 million invested in compliance measures to help level the playing field for responsible companies, and reduce greenhouse gas emissions fueling climate change.

>>

>> . Noble Energy, Inc<<http://www.epa.gov/enforcement/noble-energy-inc-settlement>>., a leading oil and gas producer, will use advanced monitoring technologies to detect air pollution problems in real-time, and ensure proper operation and maintenance of pollution control equipment at its facilities in Colorado.

>>

>> EPA holds criminal violators accountable that threaten the health and safety of Americans, while directing funds to affected communities:

>>

>> . EPA's criminal program secured \$4 billion in court-ordered environmental projects, generated \$200 million in fines and restitution, and sentenced defendants to a combined 129 years of incarceration.

>>

>> . Three subsidiaries of Duke Energy Corporation,<<http://yosemite.epa.gov/opa/admpress.nsf/ab2d81eb088f4a7e85257359003f5339/12ec4eca30be9a5d85257e45006b4215!opendocument>> the largest energy utility in the United States, agreed to pay a \$68 million criminal fine and spend \$34 million on environmental projects and land conservation to benefit rivers and wetlands in North Carolina and Virginia. As part of the plea, two Duke subsidiaries will ensure they can meet legal obligations to remediate coal ash impoundments within North Carolina, which will cost an estimated \$3.4 billion.

>>

>> EPA enforcement work reduces pollution in the sectors that impact American communities the most:

>>

>> . Settlements with Interstate Power and Light<<http://www.epa.gov/enforcement/interstate-power-and-light-company-clean-air-act-settlement>>, Duke Energy Corporation<<http://www.epa.gov/enforcement/duke-energy-corporation-clean-air-act-caa-settlement>> and power companies in Arizona and New Mexico are cutting coal fired power plant emissions, requiring companies to control pollution, and conduct innovative projects that promote renewable energy development and energy efficiency practices.

>>

>> . EPA is working closely with local governments and utilities in places like Fort Smith, Ark<<http://www.epa.gov/enforcement/city-fort-smith-arkansas-settlement>>., Delaware County, Pa<<http://www.epa.gov/enforcement/delaware-county-regional-water-quality-control-authority-clean-water-act-settlement>>., and across Puerto Rico<<http://yosemite.epa.gov/opa/admpress.nsf/d0cf6618525a9efb85257359003fb69d/da8ad2d4195f6c5685257ec1006912f3!opendocument>>, to cut discharges of raw sewage and contaminated stormwater through integrated planning, green infrastructure and other innovative approaches.

>>

>> . Cal-Maine Foods<<http://www.epa.gov/enforcement/cal-maine-foods-inc-clean-water-act>>

>>

>>

>>

>>

>>

>>
